Both a history and a fine-art book, "A Space for Faith" uses elegant black and white photographs to explore the buildings that served as the social, municipal and religious center of New England's earliest towns and cities. Built by a society that originally did not distinguish between church and state, New England's meetinghouses met the needs of both, and provided the setting for the birth of town-hall democracy. Hardcover; 128 pages; 77 duotone images.
